Douglas, here is the ROD resent with the word *bases* back in action, and the referenced attachment.

Here is the clean version that includes your updates. I changed the file name to include a "2" at the end to denote the cleaned-up version (no comments).

I reread it and caught the word *basis* incorrectly spelled as *bases* in a few places.

In moving it through the chain of command feel free to return it to me for a cleaned-up version each time we receive comments. Thx.

Bruce

Thanks Bruce: please make the necessary changes in response to my comments and then send me a version only showing all comments to date (no marked up text) and I will decide on the a version to give Sarah.

Douglas,

Thanks for adding your comments, and for the recognition. I would like to extend your "great work" comment to Lucita and Valois, as they both contributed quite a bit in order to get us to this point.

Would you like to forward this to Sarah with comments accepted, then to Darcy? I could incorporate their comments after Darcy's review, then forward a cleaned-up version to Mr. Sopkin.
Or I can do that each time prior to sending to the next manager.

Bruce

Really great work Bruce: see my suggested edits and comments.

I think we can send a clean copy forward to Sarah et al unless you think certain comments should be retained.

Thanks,

douglas

Douglas,

After working with Valois and Lucita I believe we have a CFR 147 Variance ROD to forward through the chain of command to Mr. Sopkin for his signature.

I have attached it for electronic forwarding since we are all teleworking and cannot use our usual hard-copy routing method.
